Chaos Gameday Executive Report

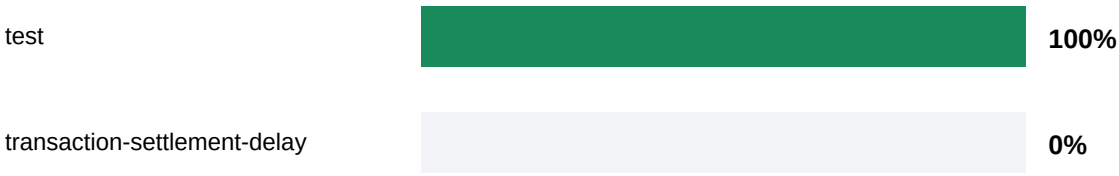
Account h1YZZt7mSo-_6odvC8wbEA | Org PMDemo | Project PM_Demo | Report date 2026-10-28

2	1	1	50%
Experiments	Passed	Failed	Avg resilience

Executive Summary

Two chaos experiments were assessed using the latest execution of each. **test** (pod-delete on *frontend-service*) completed with a **100% resilience score** and its probe passing, showing the service tolerates the injected failure. **transaction-settlement-delay** (pod-network-latency, 2s latency on *account-service*) finished as **Completed With Probe Failure** with a **0% resilience score**: the settlement-rate probe failed under injected latency, which indicates a resilience gap that needs remediation.

Resilience score by experiment



Recommendation

Prioritise the transaction-settlement path: review timeouts, retries and circuit-breaking for *account-service* under 2s network latency, then re-run the experiment to confirm the probe passes. Re-run the *test* experiment periodically to guard against regressions.

Results Overview

Experiment	Run by	Project	Start (UTC)	End (UTC)	Score	Result
test	Pritesh Kiri (pritesh.kiri@harness.io)	PMDemo / PM_Demo	2026-05-13 08:35:35	2026-05-13 08:37:57	**100%**	**Completed**
transaction-settlement-delay	udit.gaurav@harness.io	PMDemo / PM_Demo	2026-04-08 09:36:50	2026-04-08 09:38:03	**0%**	**Completed With Probe Failure**

test

Experiment ID	a428f066-e6d4-4afe-8de6-3baa760a4583
Run ID (latest, run #1 of 1)	1cc13483-12e3-49ec-9301-61a687bc2135
Executed by	Pritesh Kiri (pritesh.kiri@harness.io)
Project / Org	PM_Demo / PMDemo
Chaos infrastructure	PM_Demo/hpbprimary (KubernetesV2)
Start time	2026-05-13 08:35:35 UTC
End time	2026-05-13 08:37:57 UTC
Duration	2m 22s
Fault injected	pod-delete on frontend-service
Resilience score	100%
Run phase	Completed

Probe	Weightage	Duration	Status
hpb-get-account-validation hpb-get-account-validation-j8z	10	30s	**Passed**

transaction-settlement-delay

Experiment ID	023843af-10ca-4d99-b364-b4d7017298d4
Run ID (latest, run #2 of 2)	3ce4ba56-29cb-44fe-8ee5-183d6f217b33
Executed by	udit.gaurav@harness.io
Project / Org	PM_Demo / PMDemo
Chaos infrastructure	PM_Demo/hpbprimary (KubernetesV2)
Start time	2026-04-08 09:36:50 UTC
End time	2026-04-08 09:38:03 UTC
Duration	1m 12s
Fault injected	pod-network-latency on account-service (latency 2s, chaos duration 30s)
Resilience score	0%
Run phase	Completed_With_Probe_Failure

Probe	Weightage	Duration	Status
payment-settlement-rate-validation payment-settlement-rate-validation-nsj	10	30s	**Failed**

Notes

Data source: Harness Chaos Manager v2 APIs (GET /experiments/{id} and GET /experiments/{id}/run) for the latest execution of each experiment; user names via the Harness NG user API. Probe status is derived from the run phase (the run payload has no per-node probe results). Earlier runs are excluded.
